Empathy Map: Food Delivery App User

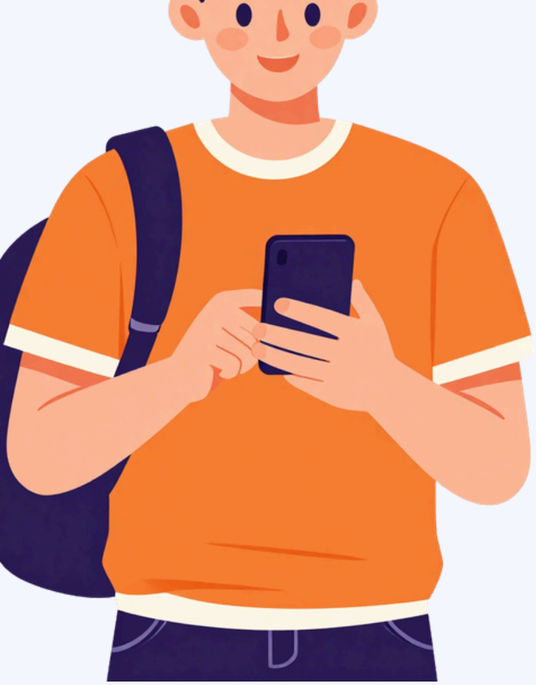

College Student User

User Research

UI/UX Research Presentation

Presented By : Shanthini Jayashree

User Needs

What the User Needs

- Easy-to-use app
- Fast delivery
- Affordable prices
- Many restaurant choices

Key Requirements

- Accurate order tracking
- Safe payment options
- Clear prices and charges
- Fresh, quality food

Needs = convenience + speed + value

The user needs convenience, speed, affordability, choice, transparency, and reliable food quality.

Empathy Map

User Frustrations

Problems that make ordering difficult

- **Late delivery**
- **High or hidden delivery charges**
- **Wrong or missing items**
- **App errors or poor support**

User Expectations

What the user expects from the app

- **On-time delivery**
- **Live order tracking**

- **Good discounts and offers**
- **Fresh and correct food**

- **Quick customer support**
- **Simple and reliable app**

Expectation: a fast, transparent and dependable food-ordering experience.
