Doctor Appointment App User Journey Map

A Mobile Healthcare Experience — Helping Patients Book Doctors Seamlessly, with Empathy & Ease

PRESENTED BY : SHANTHINI JAYASHREE J

Meet Ananya Your User Persona

Busy Professional | Age 32 | Urban Dweller

Ananya juggles a demanding career and a packed schedule, leaving little time for personal healthcare. She needs to book a doctor's appointment quickly and confidently — without long hold times, confusing portals, or uncertainty about availability. Her emotional starting point: anxious, time-pressured, and hoping for a seamless digital experience.

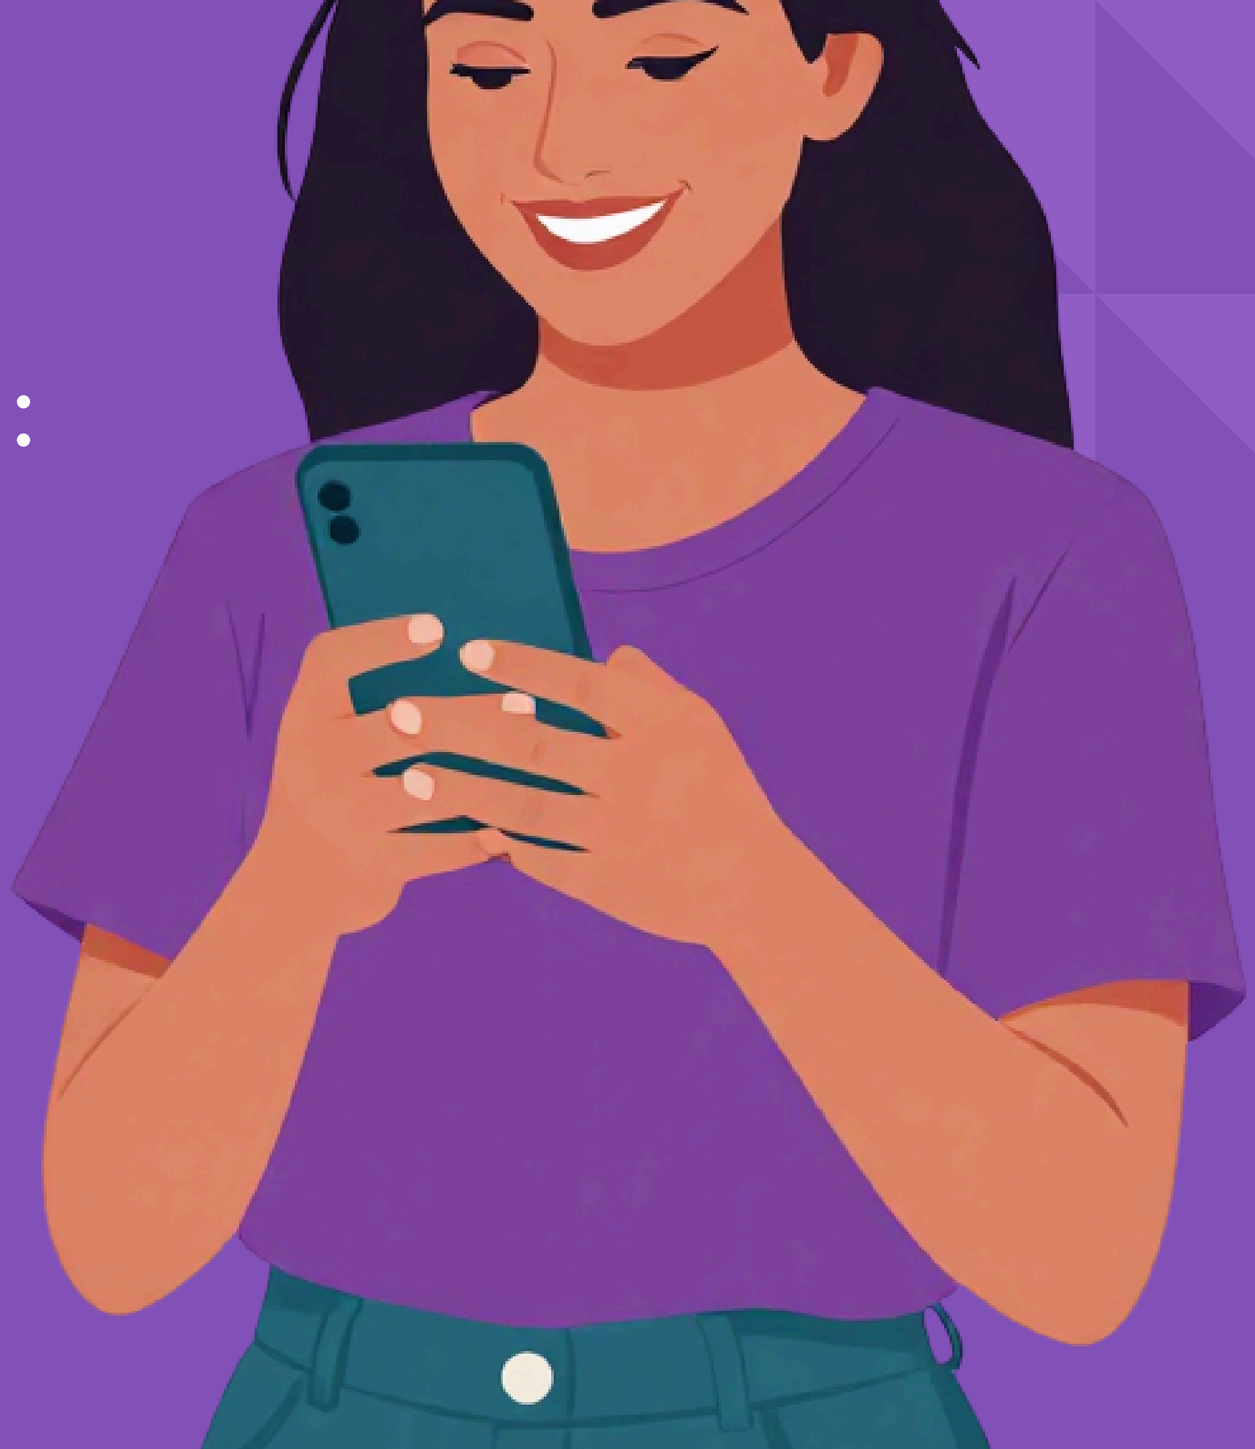

Goals: Fast booking, trusted doctor info, and instant confirmation

Patient Journey Roadmap

From Need to Confirmed Appointment

Follow Ananya through every step of booking her doctor — from realizing she needs care to receiving her confirmation reminder. Emotion markers show her experience at each milestone along the way.

Detailed Journey Map

Journey Stages & User Actions

Stage 1 — Trigger: Ananya feels unwell, searches online. Touchpoint: Browser/word-of-mouth. Thought: "I need a reliable doctor fast." Pain Point: Too many options, no clear filter. Opportunity: Smart onboarding with symptom-based doctor suggestions.

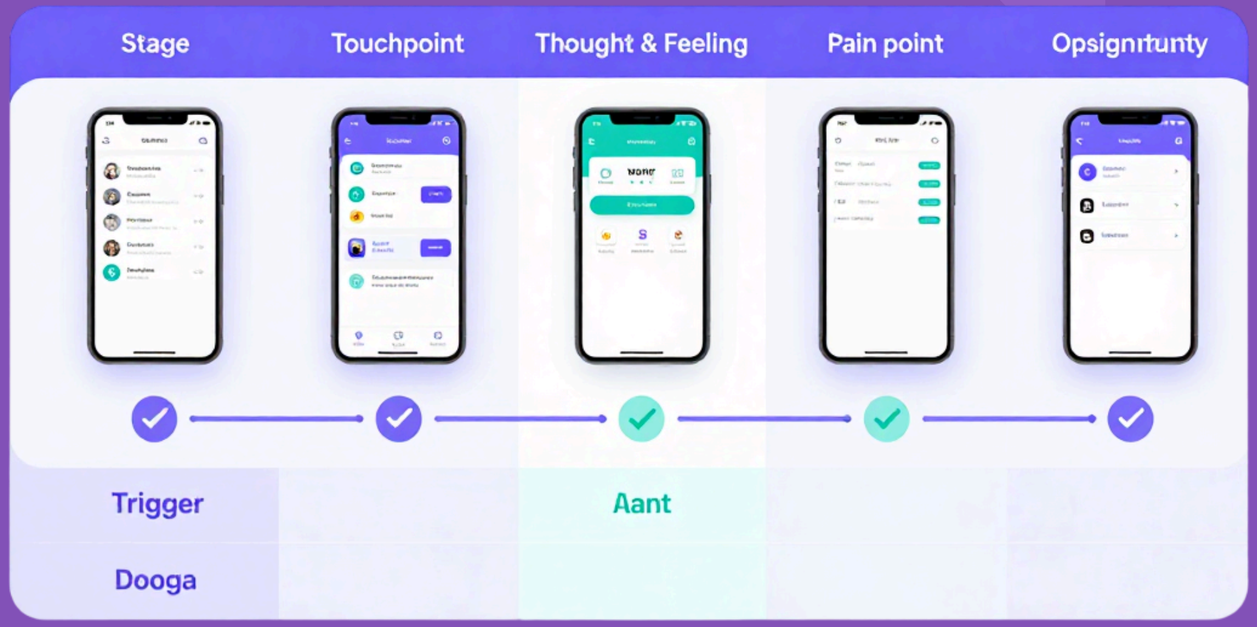

Stage 2 — Search: Filters by specialty, location, rating. Touchpoint: App search screen. Thought: "Will this doctor understand me?" Pain Point: Inconsistent profile quality. Opportunity: Verified profiles with patient reviews.

Emotion Curve & Design Opportunities

Stage 3 — Compare: Views profiles, checks availability. Touchpoint: Doctor profile screen. Feeling: Cautiously hopeful. Pain Point: Unclear slot availability. Opportunity: Real-time calendar sync.

Stage 4 — Book: Selects slot, enters details, confirms. Touchpoint: Booking flow. Feeling: Relieved → Anxious. Pain Point: Long form, no progress indicator. Opportunity: Step tracker + autofill.

Stage 5 — Confirm: Receives confirmation + reminder. Touchpoint: Push notification. Feeling: Reassured. Opportunity: Clear summary + easy reschedule option.

Emotion Curve: Anxious → Uncertain → Hopeful → Confident → Relieved

Key App Screens

Mobile UI Mockups — Core Booking Flows

Four essential screens guide Ananya from discovery to confirmation. Each screen is designed for clarity, speed, and trust — reducing friction at every step of the booking journey.

Search Doctor · Doctor Profile & Reviews · Select Time Slot · Booking Summary

Ideal End State & Design Outcomes

3 Core Design Principles

✦ Reduce Uncertainty — Clear doctor profiles, ratings & real-time slot availability

✦ Keep Momentum — Frictionless 3-tap booking with smart defaults

✦ Close the Loop — Instant confirmation + reminders = zero missed appointments

Booking Success: 94% **User Satisfaction: 4.8 / 5**

Drop-off Rate: -62% **Task Completion: 3 min avg.**
